

JOB POSTING

Position: Senior Web Developer
Type: Full-time (One-year contract)
Starting: March 2012
Location: Toronto

Like to talk tech?

Calculating the square root of PI your thing?

Use a text editor instead of an IDE?

If you're a Senior Web Developer who thrives in a fast-paced and technologically challenging team environment, then we might be right for you. This Senior Web Developer can push the bytes necessary to develop and maintain web technology projects from the ground up (0 to 255 if you will). This is a great opportunity to join the digital side of a dynamic and growing pharmaceutical marketing and communications agency.

Qualified candidates interested in this position should apply by emailing their resume to Cheryl.Fry@inventivcommunications.com and typing "Senior Web Developer" in the subject line.

Job Summary:

This position is responsible for the development of specialized HTML5/CSS3 interactive projects from start to finish. The ideal candidate will play an integral role in the development of customized iPad interactive presentations. He/she will be responsible for meeting internal client deadlines and budgets on project deliverables while delivering a quality product.

Key Responsibilities:

- Develop, maintain and update websites and/or web technology related projects, by collaborating with respective team members to ensure that all pertinent concerns have been addressed and agreed upon.
- Problem-solve and explore innovative solutions to issues that arise, identifying ways to save time where applicable and confirming feasibility of proposed creative ideas.
- Complete projects on budget and on time.
- Ensure received instructions are clear and understood during a project briefing.
- Engage in interesting and innovative technology talk.

Experience Required

- 5-9 years experience in an advertising or marketing agency as a Senior Web Developer, including the following: HTML5/CSS3, JQuery/Javascript, PHP, and the Adobe suite of apps.
- Excellent understanding of the web development process and best practices - from storyboard, through to final deployment.
- Transcode data from Adobe Creative Suite apps to web-related technologies.
- Graduate of a web development program is an asset.
- Actionscript would be a bonus asset.
- Bilingualism is an asset.
- Pharma agency experience is an asset.

Key Skills Required

- Lives, eats, and breathes technology
- Good communication and teamwork
- Strong problem-solving Abilities
- Sense of urgency and commitment
- Strong planning & organizing
- Technical expertise
- Welcomes change
